

"Climate Change" is **Ideologically Driven Science**, not Real Science.

For every 85,000 molecules of air, only 1 is human-made CO₂. How could that 1-molecule cause irreversible catastrophic global warming? It cannot!

The propaganda that 97.7 % of Climate Science papers “agree” that global warming is human-made is a lie. Only 0.5% did. (*Supporting data was fraudulent.*)

Hopefully, we teased your interest to learn the truth about the lies and deception being perpetrated on our children about the so-called “science” of Climate Change.
